## Visteon names Nomi Bergman to Board of Directors

2016-09-13

VAN BUREN TOWNSHIP, Mich., Sept. 13, 2016 — Visteon Corporation (NYSE:VC), a global leader in vehicle cockpit electronics, today announced the election of Nomi Bergman to its board of directors, effective Oct. 1, 2016.

Bergman is an accomplished business leader and technology advocate who served as president of Bright House Networks until its recently completed merger with Charter Communications and Time Warner Cable.

Bergman said: "I am honored to join the talented, dedicated members of the Visteon board, and company, who have courageously led the firm through a significant transformation. Both inspired confidence in me, as they have done with their customers. Visteon has clearly emerged with a strong balance sheet, a robust foundation of successful design and manufacturing experience, and a crisp, innovative focus on cockpit electronics and connected car solutions."

Dr. Rouzbeh Yassini, a current Visteon board member and recognized father of the cable modem, said: "Visteon's transformation to provide software platforms for the auto industry began in 2014, gained momentum with the 2015 hiring of Sachin as its CEO, and now adds more strength with the addition of Nomi to Visteon's board with her solid technical and service-oriented leadership."

Bergman was a member of the founding management team that in 2003 launched Bright House Networks, one of the largest owners and operators of cable systems in the U.S. Her hands-on experience in customer care, engineering, business and technical operations, and information technology led to a hyper-focus on the customer experience at Bright House Networks. The company received accolades from its customers and was recognized by highly regarded consumer brands such as Consumer Reports and J.D. Power and Associates – earning 12 J.D. Power awards for customer satisfaction.

A longtime advocate for women in business, Bergman launched initiatives such as the Bright House Networks Women's Leadership Circle to develop a pipeline of women leaders within the company, and helped initiate and support other similar programs within the industry.

Bergman has earned many industry leadership awards and serves on several corporate boards, as well as the board of One Revolution, a foundation established by Paralympian Chris Waddell. She is a member of the board of trustees of the University of Rochester (N.Y.), where she earned a bachelor's degree in economics and statistics.
