Visteon opens its fourth Technical Center in India

2018-11-01

Nov. 1, 2018, Panjim, Goa: Visteon, the only Tier 1 automotive supplier focused exclusively on cockpit electronics, today inaugurated its fourth India technical center in Goa.

The inaugural ceremony was attended by delegates from the Government of Goa including Shri. Rohan Khaunte, honourable minister for revenue, information technology, labour and employment and senior leaders from Visteon, including Matt Cole, senior vice president product development; and Kristin Trecker, chief human resources officer. Rohan Khaunte and Matt Cole cut the ribbon at the opening ceremony.

Speaking at the event, Mr. Khaunte said "It is a very proud moment for all of us. Looking at hitech industries, Visteon is very well known in this sector and this new technical center for AI and deep learning is a big boost for us. Technology companies like Visteon will offer opportunity to young graduates and attract a pool of technical talent to Goa."

The center in Goa, will collaborate closely with Visteon's technical centers in India and will support the company's development of artificial intelligence software, advanced driver awareness systems and deep learning for autonomous vehicles.

The new technology center in Panjim has a seating capacity of 50 with the potential for expansion. Visteon plans to fill majority of its open positions with graduates from local universities.
