## Visteon wins Jaguar Land Rover supplier excellence award for longstanding relationship and innovative technology

2019-06-06

CHELMSFORD, UK, June 6, 2019 — Visteon Corporation (NASDAQ:VC), a global cockpit electronics leader, has been recognized for providing innovative technology to Jaguar Land Rover (JLR) over the course of a longstanding relationship. At the automaker's annual Supplier Excellence Awards ceremony, Visteon was among a select group of suppliers honored for demonstrating technical innovation, on-time delivery and high quality standards, and for consistently meeting production and design challenges.

Since the start of the collaboration in 2001, Visteon has supported JLR engineers and designers in the development of several innovative features for their global vehicle lines, including the industry-first fully reconfigurable digital instrument cluster launched in the 2009 Range Rover and the dual view display in 2015.

Visteon President and CEO Sachin Lawande received the award from JLR's CEO Prof. Dr. Ralf Speth, and Ian Harnett, director of global purchasing.

Visteon currently supplies a range of instrument clusters and information displays – including infotainment and rear seat entertainment – to the latest Jaguar F-PACE, I-PACE and E-PACE models in addition to the Jaguar XE and XJ range, as well as all Range Rover, Range Rover Sport, Velar and Evoque models and the Land Rover Discovery and Discovery Sport.
