Why Tech Innovators Love The Automotive Industry

2024-01-18

Visteon has become a hotbed of tech innovators looking to leave their mark on the future of mobility. Software and hardware engineers, talent management directors and project managers have eagerly shifted gears from their roles at top-tier tech companies to seek a career at Visteon. What makes Visteon an exciting destination for tech talent?

Innovation and Impact

Visteon's teams are excited to tackle cutting-edge projects. They develop innovative solutions that make a real difference in the automotive industry. Rishita, Director of Product Management, has a true passion for her work on the **Android Automotive App Store**. This technology, originally designed for phones and tablets, is being adapted by Visteon to create a smoother and more connected driving experience. She emphasized that Visteon is developing similar, if not more state-of-the-art, platforms that every major mobile carrier offers. "Visteon's Android Automotive App Store and other app store products are a testament to our ability to deliver innovative solutions meeting the ever-changing needs of our industry," said Rishita.

Emanuila, Visteon's Digital Marketing Manager, was excited to join Visteon because the company is leading the way in a major industry change. She said, "The future of mobility is all about going digital and electric; we're starting to see our cars more like our smartphones nowadays, and that impacts what we expect them to do. At Visteon, you're at the heart of this transformation. Here, you can learn new skills, face new challenges, and make a real difference in a product-driven company."

Tech leaders are drawn to Visteon for its role in driving the transformative shifts unfolding in mobility. Within the software-defined vehicle landscape, Visteon's team spearheads the development of groundbreaking products and

services. Their efforts translate directly into tangible outcomes: our innovations are integrated into one out of every five cars currently on the road. Additionally, through over-the-air updates, our solutions continuously enhance the driving experience for car owners worldwide.

Thomas, Vice President of Visteon's German OEM Business Group, said, "Visteon represents the ideal blend: a fast-moving and agile tech company with a wide-ranging product portfolio, fueled by a true passion for technology across every level, and strong goals for growth. Being here, I feel my grip and influence on our daily business."

Dynamic and Forward-Thinking Culture

Visteon's culture emphasizes agility, adaptability and constantly finding new ways to reimagine what's possible. This means employees have the freedom to come up with new ideas and confidently handle challenges.

Stelian, Regional Software Leader for Europe, says, "At Visteon, good work is recognized. The culture enables faster communication and collaboration. Employees at all levels have the chance to take an active part in projects and the opportunity to tackle challenges immediately as they arise."

Visteon's employees also value the opportunity to advance within a company at the forefront of industry transformation.

Rituparna, Senior Director and Global Head of Talent Management said, "Being at the center of this disruption in automotive technology is exciting because it allows you the opportunity to grow and learn. At Visteon, we're always ahead of the game."

Company Success and Reputation

Visteon is an industry leader in delivering high-tech, complex products, with a reputation that attracts professionals seeking a rewarding and challenging work environment.

Stelian said Visteon caught his attention as a "different type of player." Likewise, Emanuila notes that despite being an industry leader, Visteon "retains the agility and innovation of a start-up." This allows the company to quickly adjust to new technologies and stay at the forefront of industry trends.

Join Us!

As the automotive industry undergoes tremendous growth and transformation, Visteon not only adapts but thrives.
