Non-GAAP Measures of Financial Performance

To supplement our financial statements, which are presented on the basis of U.S. generally accepted accounting principles (GAAP), the following non-GAAP measures of financial performance are included in this release: revenue growth rate at constant currency, adjusted gross profit and adjusted gross margin, adjusted income from operations and adjusted operating margin, earnings before interest, taxes, depreciation and amortization (EBITDA), adjusted EBITDA, adjusted net income and adjusted earnings per diluted share (EPS). The Company provides revenue growth rates in constant currency to exclude the impact of foreign currency translation in order to facilitate a comparison of its current revenue performance to its past revenue performance. To calculate revenue growth rates in constant currency, the Company converts actual net sales from local currency to U.S. dollars using constant foreign currency exchange rates in the current and prior period.

The Company's non-GAAP financial results and/or non-GAAP guidance exclude the impact of: acquisition costs related to the Company's acquisitions of Atoll GmbH, TangenX Technology Corporation, and Spectrum Lifesciences, LLC (formerly known as Spectrum, Inc.), inventory step-up charges related to the acquisition of Spectrum Inc., intangible amortization costs, non-cash interest expense, and in the case of EBITDA, cash interest expense related to the Company's May 2016 convertible debt issuance. Also excluded are tax benefits associated with valuation allowances on deferred tax assets, the impact on tax of intangible amortization, tax benefits associated with variable integration expenses and tax benefits associated with tax reform. These costs are excluded because management believes that such expenses do not have a direct correlation to future business operations, nor do the resulting charges recorded accurately reflect the performance of our ongoing operations for the period in which such charges are recorded.

A reconciliation of GAAP to adjusted non-GAAP financial measures is included as an attachment to this press release. When analyzing the Company's operating performance and guidance investors should not consider non-GAAP measures as substitutable for the comparable financial measures prepared in accordance with GAAP.
