

## Repligen to Present at 37th Annual J.P. Morgan Healthcare Conference

2019-01-03

WALTHAM, Mass., Jan. 03, 2019 (GLOBE NEWSWIRE) -- Repligen Corporation (NASDAQ:RGEN), a life sciences company focused on bioprocessing technology leadership, today announced that it will present at the 37<sup>th</sup> Annual J.P. Morgan Healthcare conference being held January 7-10 at the Westin St. Francis in San Francisco. Tony J. Hunt, President and Chief Executive Officer, will make a formal presentation on Tuesday, January 8, at 5:30 p.m. PST.

A live webcast of the presentation will be accessible through the **Investor Events** section of the Company's website, and will be available for replay for a limited period of time following the conference event.

### About Repligen Corporation

Repligen Corporation (NASDAQ:RGEN) is a bioprocessing-focused company that develops and commercializes highly innovative products that deliver cost and process efficiencies to biological drug manufacturers worldwide. Our portfolio includes protein products (Protein A affinity ligands, cell culture growth factors), chromatography products (OPUS® pre-packed columns, chromatography resins, ELISA kits) and filtration products (XCell™ ATF systems, SIUS™ flat sheet TFF cassettes, and Spectrum KrosFlo™ hollow fiber TFF cartridges and systems). The Protein A ligands and growth factor products that we produce are key components of Protein A affinity resins and cell culture media, respectively. Protein A affinity resins are the industry standard for downstream separation and purification of monoclonal antibody-based therapeutics. Growth factors are used in upstream processes to accelerate cell growth and productivity. Our innovative line of OPUS® chromatography columns, used in downstream processes for bench-scale to commercial-scale purification needs, are delivered pre-packed and customized to our customers choice of resin and packed bed height. Our XCell™ ATF Systems, available in stainless steel and single-use configurations, continuously eliminate waste from a bioreactor to concentrate cells and significantly increase productivity in upstream processes. Single-use SIUS™ TFF cassettes and hardware are used for

biologic drug concentration in downstream filtration processes. Spectrum KrosFlo™ TFF cartridges and systems are used in both upstream and downstream filtration processes. Repligen's corporate headquarters are in Waltham, MA (USA), with additional administrative and manufacturing operations at locations including Shrewsbury, MA, Rancho Dominguez, CA, Lund, Sweden and Ravensburg, Germany.
