## Repligen to Present at Bank of America Merrill Lynch 2017 Healthcare Conference

2017-05-09

WALTHAM, Mass., May 09, 2017 (GLOBE NEWSWIRE) -- Repligen Corporation (NASDAQ:RGEN), a life sciences company focused on bioprocessing technology leadership, today announced that management will present at the Bank of America Merrill Lynch 2017 Healthcare Conference in Las Vegas on Tuesday, May 16 at 2:20 p.m. Pacific Time.

A live webcast of the presentation will be accessible through the **Investor Events** section of the Company's website, and will be available for replay for a limited period of time following the conference event.

### About Repligen Corporation

Repligen Corporation (NASDAQ:RGEN) is a bioprocessing company focused on the development, manufacture and commercialization of highly innovative products used to improve the interconnected phases of the biological drug manufacturing process. Our portfolio includes protein products (Protein A affinity ligands, cell culture growth factors), chromatography products (OPUS® pre-packed columns, chromatography resins, ELISA kits) and filtration products (XCell™ ATF Systems, TangenX™ Sius™ TFF cassettes). Our bioprocessing products are sold to major life sciences companies, biopharmaceutical development companies and contract manufacturing organizations worldwide. The Protein A ligands and growth factor products that we manufacture are components of chromatography resins and cell culture media, respectively. We are the leading manufacturer of Protein A ligands, a critical component of Protein A resins that are the industry standard for downstream separation and purification of monoclonal antibody-based therapeutics. Our growth factors are used in upstream processes to accelerate cell growth and productivity. Our innovative line of OPUS® chromatography columns, used in downstream processes for bench-scale through clinical-scale purification needs, are delivered pre-packed with our customers' choice of

resin and bed height. Our XCell™ ATF Systems, available in stainless steel and single-use configurations, continuously eliminate waste from a bioreactor to concentrate cells and increase productivity in upstream processes. TangenX Sius™ TFF single-use cassettes and hardware are used for biologic drug concentration in downstream processes. Repligen's corporate headquarters are in Waltham, MA (USA) and our manufacturing facilities are located in Waltham, MA, Shrewsbury, MA, Lund, Sweden and Weingarten, Germany.
