

NEWS RELEASE

Repligen to Present at Jefferies 2019 Healthcare Conference

2019-06-04

WALTHAM, Mass., June 04, 2019 (GLOBE NEWSWIRE) -- Repligen Corporation (NASDAQ:RGEN), a life sciences company focused on bioprocessing technology leadership, today announced that Jon K. Snodgres, Chief Financial Officer, will present at the Jefferies 2019 Global Healthcare Conference on Thursday, June 6 at 8:30 a.m. EDT.

A live audio webcast of the presentation will be accessible through the **Investor Events** section of the Company's website, and will be available for replay for a limited period of time following the conference event.

About Repligen Corporation

Repligen Corporation (NASDAQ:RGEN) is a global bioprocessing company that develops and commercializes highly innovative products that deliver cost and process efficiencies to biological drug manufacturers worldwide.

Our portfolio includes filtration products (including XCell™ ATF, TangenX™ SIUS™ TFF and Spectrum KrosFlo™ TFF filters and systems), chromatography products (OPUS® pre-packed columns, chromatography resins, ELISA kits), process analytics products (SoloVPE and FlowVPE instruments and systems) and protein products (Protein A affinity ligands including NGL Impact®-A, cell culture growth factors).

Our XCell™ ATF Systems, available in stainless steel and single-use configurations, are used in perfusion processes to continuously concentrate cells and increase product yield from a bioreactor. Single-use SIUS™ TFF cassettes and hardware are used for biologic drug concentration in downstream filtration processes. KrosFlo™ TFF cartridges and systems are used in both upstream and downstream filtration processes. Our innovative line of OPUS® chromatography columns, used in bench-scale through commercial-scale biologics purification, are delivered pre-packed to our customers with their choice of affinity resin. Our process analytics products, which are used in both upstream and downstream applications, enable at-line and in-line protein concentration measurement in filtration,

chromatography and fill-finish operations. The Protein A ligands and growth factor products that we produce are essential components of Protein A affinity resins used in biologics purification, and cell culture media used to accelerate cell growth in a bioreactor.

Repligen's corporate headquarters are in Waltham, MA (USA), with additional administrative and manufacturing operations in Marlborough, MA; Rancho Dominguez, CA; Lund, Sweden; Breda, The Netherlands and Ravensburg, Germany.
