GLOSSARY OF ABBREVIATIONS AND ACRONYMS

The acronyms and abbreviations identified below are used throughout this report.

Acronym/Abbreviation	Definition
AOCI	Accumulated other comprehensive income (loss)
Basel Committee	Basel Committee on Banking Supervision
BHC Act	Bank Holding Company Act of 1956, as amended
Bremer	Bremer Financial Corporation
Capital Rules	Final rules establishing a new comprehensive capital framework for U.S. banking organizations
CET1	Common Equity Tier 1 Capital, defined by Basel III capital rules
CFR	Code of Federal Regulation
Dodd-Frank Act	Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010
FDIA	Federal Deposit Insurance Act
FDIC	Federal Deposit Insurance Corporation
Federal Reserve	Board of Governors of the Federal Reserve System
FHLB	Federal Home Loan Bank
GAAP	U.S. Generally Accepted Accounting Principles
Merger	Merger between Old National and Bremer
OCC	Office of the Comptroller of the Currency
Old National Bank or the Bank	Old National Bank, a wholly owned subsidiary of Old National Bancorp
Old National or the Company	Old National Bancorp, collectively with its consolidated subsidiaries
OTC	Over-the-counter
SEC	U.S. Securities and Exchange Commission

FORWARD-LOOKING STATEMENTS

This report contains certain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 (the “Act”), Section 27A of the Securities Act of 1933 and Rule 175 promulgated thereunder, and Section 21E of the Securities Exchange Act of 1934 and Rule 3b-6 promulgated thereunder, notwithstanding that such statements are not specifically identified as such. In addition, certain statements may be contained in our future filings with the SEC, in press releases, and in oral and written statements made by us that are not statements of historical fact and constitute forward-looking statements within the meaning of the Act. These statements include, but are not limited to, descriptions of Old National’s financial condition, results of operations, asset and credit quality trends, profitability and business plans or opportunities. Forward-looking statements can be identified by the use of words such as “anticipate,” “believe,” “contemplate,” “continue,” “could,” “estimate,” “expect,” “guidance,” “intend,” “may,” “outlook,” “plan,” “potential,” “predict,” “should,” “would,” and “will,” and other words of similar meaning. These forward-looking statements express management’s current expectations or forecasts of future events and, by their nature, are subject to risks and uncertainties. There are a number of factors that could cause actual results or outcomes to differ materially from those in such statements, including, but not limited to: competition; government legislation, regulations and policies, including trade and tariff policies; the ability of Old National to execute its business plan; unanticipated changes in our liquidity position, including but not limited to changes in our access to sources of liquidity and capital to address our liquidity needs; changes in economic conditions and economic and business uncertainty which could materially impact credit quality trends and the ability to generate loans and gather deposits; inflation and governmental responses to inflation, including increasing interest rates; market, economic, operational, liquidity, credit, and interest rate risks associated with our business; our ability to successfully manage our credit risk and the sufficiency of our allowance for credit losses; the impact of purchase accounting with respect to the merger between Old National and Bremer (the “Merger”), or any change in the assumptions used regarding the assets acquired and liabilities assumed to determine their fair value and credit marks; the potential impact of future business combinations on our performance and financial condition, including our ability to successfully integrate the businesses, the success of revenue-generating and cost reduction initiatives and the diversion of management’s attention from ongoing business operations and opportunities; failure or circumvention of our internal controls; operational risks or risk management failures by us or critical third parties, including without limitation with respect to data processing, information technology systems, cybersecurity, technological changes, vendor issues, business interruption, and fraud risks; significant changes in accounting, tax or regulatory practices or requirements; new legal obligations or liabilities; disruptive technologies in payment systems and other services traditionally provided by banks; adverse effects on our information technology systems, or those of third parties, resulting from failures, disruptions or cybersecurity attacks, including ransomware; security breaches, including denial of service attacks, hacking, social engineering attacks, malware intrusion and other cybersecurity threats; the effects of climate change on Old National and its customers, borrowers, or service providers; political and economic uncertainty and instability; the impacts of pandemics, epidemics and other infectious disease outbreaks; other matters discussed in this report; and other factors identified in our 2025 Annual Report on Form 10-K and other filings with the SEC. These forward-looking statements are made only as of the date of this report and are not guarantees of future results, performance, or outcomes.

Such forward-looking statements are based on assumptions and estimates, which although believed to be reasonable, may turn out to be incorrect. Therefore, undue reliance should not be placed upon these estimates and statements. We cannot assure that any of these statements, estimates, or beliefs will be realized and actual results or outcomes may differ from those contemplated in these forward-looking statements. Old National does not undertake an obligation to update these forward-looking statements to reflect events or conditions after the date of this report. You are advised to consult further disclosures we may make on related subjects in our filings with the SEC.

Investors should consider these risks, uncertainties, and other factors in addition to the factors under the heading “Risk Factors” included in Item 1A of Part I of Old National’s 2025 Form 10-K and our other filings with the SEC.

Organization

Old National Bancorp, the financial holding company of Old National Bank, our wholly owned banking subsidiary, is incorporated in the state of Indiana, is the sixth largest Midwestern-headquartered bank by asset size with consolidated assets of \$73.0 billion at March 31, 2026, and ranks among the top 25 banking companies headquartered in the United States. The Company's corporate headquarters and principal executive office are located in Evansville, Indiana with commercial and consumer banking operations headquartered in Chicago, Illinois. Through Old National Bank and our non-bank affiliates, we provide a wide range of services primarily throughout the Midwest and Southeast regions of the United States. In addition to providing extensive services in consumer and commercial banking, Old National offers comprehensive wealth management and capital markets services.

Old National is subject to extensive and comprehensive regulation under federal and state laws. The regulatory framework is intended primarily for the protection of depositors, federal deposit insurance funds, and the banking system as a whole and not for the protection of shareholders or non-depository creditors.

As a bank holding company and financial holding company, Old National Bancorp is subject to supervision, examination, and regulation by the Federal Reserve under the BHC Act, and is required to file reports with the Federal Reserve and to provide the Federal Reserve any additional information it may require. As a national bank, Old National Bank is subject to primary regulation, supervision, and examination by the OCC.

Regulatory Capital Standards and Disclosures

Capital Requirements. Old National Bancorp and Old National Bank are each required to comply with certain risk-based capital and leverage requirements under capital rules adopted by the Federal Reserve, the OCC, and the FDIC (the "Basel III Capital Rules"). These rules implement the Basel III framework set forth by the Basel Committee as well as certain provisions of the Dodd-Frank Act.

The Basel III Capital Rules define qualifying capital instruments and specify minimum amounts of capital as a percentage of assets that banking organizations are required to maintain. Under the Basel III Capital Rules, risk-based capital ratios are calculated by dividing CET1 capital, Tier 1 capital and total risk-based capital, respectively, by risk-weighted assets. Assets and off-balance sheet credit equivalents are assigned a risk weight based primarily on supervisory assessments of relative credit risk.

Under the Basel III Capital Rules, the Company and Old National Bank are each required to maintain the following:

- A minimum ratio of CET1 to risk-weighted assets of 4.5%, plus a 2.5% "capital conservation buffer" that is composed entirely of CET1 capital (effectively resulting in a minimum ratio of CET1 to risk-weighted assets of 7.0%).
- A minimum ratio of Tier 1 capital to risk-weighted assets of 6.0%, plus the capital conservation buffer (effectively resulting in a minimum Tier 1 capital ratio of 8.5%).
- A minimum ratio of total capital (Tier 1 capital plus Tier 2 capital) to risk-weighted assets of 8.0%, plus the capital conservation buffer (effectively resulting in a minimum total capital ratio of 10.5%).
- A minimum leverage ratio of 4.0%, calculated as the ratio of Tier 1 capital to average assets.

The capital conservation buffer is designed to absorb losses during periods of economic stress. Banking institutions with a ratio of CET1 to risk-weighted assets above the minimum, but below the conservation buffer, will face constraints on dividends, equity repurchases, and compensation based on the amount of the shortfall and the institution's "eligible retained income" (that is, the greater of (i) net income for the preceding four quarters, net of distributions and associated tax effects not reflected in net income and (ii) average net income over the preceding four quarters).

The Basel III Capital Rules also provide for a number of deductions from and adjustments to CET1 capital. As a "non-advanced approaches" firm under the Basel III Capital Rules, the Company is subject to rules that provide for simplified capital requirements relating to the threshold deductions for mortgage servicing assets, deferred tax assets arising from temporary differences that a banking organization could not realize through net operating loss carry backs, and investments in the capital of unconsolidated financial institutions, as well as the inclusion of minority interests in regulatory capital.

The Company and Old National Bank, as non-advanced approaches banking organizations under the Basel III Capital Rules, made a one-time permanent election to exclude the effects of certain AOCI items included in shareholders' equity under GAAP in determining regulatory capital ratios.

In December 2017, the Basel Committee published standards that it described as the finalization of the Basel III post-crisis regulatory reforms. Among other things, these standards revise the Basel Committee's standardized approach for credit risk (including the recalibration of risk weights and introducing new capital requirements for certain "unconditionally cancellable commitments," such as unused credit card lines of credit) and provide a new standardized approach for operational risk capital. Under the current U.S. capital rules, operational risk capital requirements and a capital floor apply only to advanced approaches banking organizations, and therefore not to the Company or Old National Bank.

On July 27, 2023, the federal banking regulators proposed revisions to the Basel III Capital Rules to implement the Basel Committee's 2017 standards and make other changes to the Basel III Capital Rules. The revised capital requirements of the proposed rule would not apply to the Company or Old National Bank because they have less than \$100 billion in total consolidated assets and trading assets and liabilities below the threshold for market risk requirements. The federal banking regulators have indicated that they expect to issue a revised proposal.

Prompt Corrective Action. The FDIA requires the federal banking agencies to take "prompt corrective action" for depository institutions that do not meet the minimum capital requirements described above. The FDIA includes the following five capital categories: "well-capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized" and "critically undercapitalized." An insured depository institution is considered:

- "Well-capitalized" if the institution has a total risk-based capital ratio of 10.0% or greater, a Tier 1 risk-based capital ratio of 8.0% or greater, a CET1 capital ratio of 6.5% or greater, and a leverage ratio of 5.0% or greater, and is not subject to any order or written directive by any such regulatory authority to meet and maintain a specific capital level for any capital measure.
- "Adequately capitalized" if the institution has a total risk-based capital ratio of 8.0% or greater, a Tier 1 risk-based capital ratio of 6.0% or greater, a CET1 capital ratio of 4.5% or greater, and a leverage ratio of 4.0% or greater and is not "well-capitalized."
- "Undercapitalized" if the institution has a total risk-based capital ratio of less than 8.0%, a Tier 1 risk-based capital ratio of less than 6.0%, a CET1 capital ratio of less than 4.5%, or a leverage ratio of less than 4.0%.
- "Significantly undercapitalized" if the institution has a total risk-based capital ratio of less than 6.0%, a Tier 1 risk-based capital ratio of less than 4.0%, a CET1 capital ratio of less than 3.0% or a leverage ratio of less than 3.0%.
- "Critically undercapitalized" if the institution's tangible equity is equal to or less than 2.0% of average quarterly tangible assets.

An institution may be downgraded to, or deemed to be in, a capital category that is lower than indicated by its capital ratios if it is determined to be in an unsafe or unsound condition or if it receives an unsatisfactory examination rating for certain matters. A bank's capital category is determined solely for the purpose of applying prompt corrective action regulations, and the capital category may not constitute an accurate representation of the bank's overall financial condition or prospects for other purposes. As of March 31, 2026, Old National Bank's capital ratios were all in excess of the minimum requirements for "well-capitalized" status under such rules.

The federal banking regulators must take certain mandatory supervisory actions, and are authorized to take other discretionary actions, with respect to institutions that are less than adequately capitalized, with supervisory actions progressively becoming more restrictive as the institution's capital category declines. Supervisory actions include: (i) restrictions on payment of capital distributions and management fees, (ii) requirements that a federal bank regulator monitor the condition of the institution and its efforts to restore its capital, (iii) submission of a capital restoration plan, (iv) restrictions on the growth of the institution's assets and (v) requirements for prior regulatory approval of certain expansion proposals. A bank that is "critically undercapitalized" will be subject to further restrictions and generally will be placed in conservatorship or receivership within 90 days.

The FDIA prohibits an insured depository institution from accepting brokered deposits or offering interest rates on any deposits significantly higher than the prevailing rate in the bank's normal market area or nationally (depending upon where the deposits are solicited), unless it is well-capitalized or is adequately capitalized and receives a waiver

from the FDIC. A depository institution that is adequately capitalized and accepts brokered deposits under a waiver from the FDIC may not pay an interest rate on any deposits in excess of 75 basis points over certain prevailing market areas.

The FDIA's prompt corrective action provisions apply only to depository institutions, and not to bank holding companies. Under the Federal Reserve's regulations, a bank holding company is considered "well capitalized" if the bank holding company (i) has a total risk based capital ratio of at least 10%, (ii) has a Tier 1 risk-based capital ratio of at least 6%, and (iii) is not subject to any written agreement order, capital directive or prompt corrective action directive to meet and maintain a specific capital level for any capital measure. Although prompt corrective action regulations apply only to depository institutions and not to bank holding companies, a bank that is required to submit a capital restoration plan generally must concurrently submit a performance guarantee by its parent holding company. The liability of the parent holding company under any such guarantee is limited to the lesser of five percent of the bank's assets at the time it became "undercapitalized", or the amount needed to comply.

Disclosures. The qualitative and quantitative disclosures in this report regarding Old National's capital structure, capital adequacy, risk exposures, risk-weighted assets, and market risk are based on management's current understanding of Basel III as described in Title 12 CFR Subsections 61-63 and other factors, which may be subject to change as additional clarification and implementation guidance is received from regulators and the interpretation of the rule evolves over time. The disclosures were reviewed and approved in accordance with Old National's financial reporting disclosure policy, which has been approved by Old National's Board of Directors.

These Regulatory Capital Disclosures should be read in conjunction with Old National's 2025 Form 10-K as well as the Consolidated Financial Statements for Holding Companies - FR Y-9C dated March 31, 2026. The Regulatory Capital Disclosures Matrix presented in Appendix 1 specifies where all disclosures required by the Basel III Capital Rules are located.

Scope of Application

Old National's basis of consolidation for both financial and regulatory reporting purposes conforms to U.S. GAAP and prevailing practices within the banking industry. Additionally, where applicable, the policies conform to the accounting and reporting guidelines prescribed by bank regulatory authorities. Some of Old National's equity investments accounted for under either the proportional method, equity method, or cost method are neither consolidated nor deducted from regulatory capital under Basel III, but instead are assigned an appropriate risk weight. There are no entities within Old National that are deconsolidated or whose capital is deducted for Basel III. As of March 31, 2026, total capital for Old National and Old National Bank exceeded their respective minimum required regulatory capital amount. For additional information about Old National's basis of presentation and consolidation, see Note 1, Basis of Presentation and Significant Accounting Policies, to the consolidated financial statements included in Item 8 of Part II of Old National's 2025 Form 10-K.

Transactions with Affiliates. Any transactions between Old National Bank and its subsidiaries and Old National Bancorp or any other subsidiary of Old National Bancorp are regulated under federal banking law. The Federal Reserve Act imposes quantitative and qualitative requirements and collateral requirements on covered transactions by Old National Bank with, or for the benefit of, its affiliates, and generally requires those transactions to be on terms at least as favorable to Old National Bank as would be a transaction conducted between unaffiliated third-parties. For further information, see "Transactions with Affiliates" in Item 1 of Part I of Old National's 2025 Form 10-K.

Dividends Limitations. A substantial portion of Old National Bancorp's revenue is derived from dividends paid to it by Old National Bank. Under OCC regulations, national banks generally may not declare a dividend in excess of the bank's undivided profits or, absent OCC approval, if the total amount of dividends declared by the national bank in any calendar year exceeds the total of the national bank's retained net income year-to-date combined with its retained net income for the preceding two years. For further information, see "Dividends Limitations" in Part I, Item 1 and Note 21, "Regulatory Restrictions" of Old National's 2025 Form 10-K.

Share Repurchase Program. In the first quarter of 2026, the Company's Board of Directors approved a share repurchase program, under which the Company is authorized to repurchase up to \$400 million of its outstanding shares of common stock through February 28, 2027. Share repurchases under this program may be made from time

to time on the open market, in privately negotiated transactions, or through accelerated share repurchase programs in the discretion of, and at prices to be determined by, the Company.

Capital Structure

Old National has issued a variety of capital instruments to meet its regulatory capital requirements and business interests. Old National's current qualifying regulatory capital instruments consist of common stock that qualifies as CET1, non-cumulative perpetual preferred stock that qualifies as additional Tier 1 capital, and subordinated debt that qualifies as Tier 2 capital. Each share of common stock is entitled to one vote on all matters submitted to a vote of shareholders. Except as otherwise required by law or provided in any resolution adopted by the Board with respect to any series of preferred stock, the holders of common stock possess all voting power. Holders of shares of common stock do not have cumulative voting rights. In the event of any liquidation, dissolution, or winding up of the Company, holders of shares of common stock are entitled to ratable distribution of the remaining assets available for distribution to shareholders, subject to the rights of any outstanding series of preferred stock. Each depository share of Old National's preferred stock entitles the holder to proportional rights and preferences (including dividend, voting, redemption, and liquidation rights).

The Company and Old National Bank, as non-advanced approaches banking organizations under the Basel III Capital Rules, made a one-time permanent election to exclude the effects of certain AOCI items included in shareholders' equity under GAAP in determining regulatory capital ratios.

Table 2: Reconciliation of shareholders' equity to total capital

The following table reconciles total shareholders' equity to the amount of CET1 capital, tier 1 capital, and total regulatory capital.

(dollars in thousands)	Old National Bancorp	Old National Bank
March 31, 2026		
Preferred stock	\$ 230,500	\$ —
Common stock	386,315	65,070
Capital surplus	5,855,180	6,143,671
Retained earnings	2,581,912	2,548,048
Accumulated other comprehensive income (loss), net of tax	(543,254)	(543,105)
Total shareholders' equity	8,510,653	8,213,684
Less: Preferred stock, including related capital surplus	(243,719)	—
Total common shareholders' equity	8,266,934	8,213,684
Less adjustments and deductions:		
Goodwill and intangibles, net of associated deferred tax liabilities	(2,752,880)	(2,660,841)
Deferred tax assets	(24,816)	(19,045)
AOCI-related adjustments	543,254	543,105
Total CET1 capital	6,032,492	6,076,903
Add: Preferred stock, including related capital surplus	243,719	—
Total Tier 1 capital	6,276,211	6,076,903
Qualifying subordinated debt	648,499	—
Allowance for credit losses included in Tier 2 capital	519,529	519,529
Tier 2 capital	1,168,028	519,529
Total regulatory capital	\$ 7,444,239	\$ 6,596,432

Further details about Old National's regulatory capital can be found in Schedule HC-R to the March 31, 2026 Consolidated Financial Statements for Holding Companies – Form FR Y-9C.

Capital Adequacy

Capital Adequacy Process. Old National and the banking industry are subject to various regulatory capital requirements administered by the federal banking agencies. Management routinely analyzes Old National's capital to ensure an optimized capital structure. Accordingly, such evaluations may result in Old National taking a capital action. Management views stress testing as an integral part of the Company's risk management and strategic planning activities. Old National performs stress testing periodically throughout the year. The primary objective of the stress testing is to ensure that Old National has a robust, forward-looking stress testing process and maintains sufficient capital to continue operations throughout times of economic and financial stress. Management also uses the stress testing framework to evaluate decisions relating to pricing, loan concentrations, capital deployment, and mergers and acquisitions to ensure that strategic decisions align with Old National's risk appetite statement. Old National's stress testing process incorporates key risks that include strategic, market, liquidity, credit, operational, information security and technology, talent management, and compliance/regulatory/legal risks. Old National's stress testing policy outlines steps that will be taken if stress test results do not meet internal thresholds under severely adverse economic scenarios.

Risk-weighted Assets

Table 3-1: Risk-weighted assets by exposure type

The following table presents risk-weighted assets by exposure type, using the categorization based on the standardized definitions and per the Basel III requirements.

(dollars in thousands)	Old National Bancorp	Old National Bank
March 31, 2026		
Cash and balances due from depository institutions	\$ 27,519	\$ 27,519
Exposures to state and local governments in the U.S.	2,324,960	2,324,960
Corporate exposures	279,657	179,203
Residential mortgage exposures	8,365,400	8,365,400
High volatility commercial real estate loans	47,874	47,874
Past due loans	575,561	575,561
Other loan exposure, including held-for-sale	33,069,293	33,069,293
Other assets	3,716,417	3,597,034
Separate account bank-owned life insurance	276,412	242,279
Securitization exposures	5,071	5,071
Standby letters of credit	176,592	176,592
Unused and cancellable commitments	5,096,650	5,096,650
Derivatives	317,765	317,765
Other off-balance sheet items	4,574	4,574
Total risk-weighted assets	\$ 54,283,745	\$ 54,029,775

Further details about Old National's risk-weighted assets can be found in Schedule HC-R to Old National's March 31, 2026 Consolidated Financial Statements for Holding Companies – Form FR Y-9C.

Risk-based Capital Ratios

Old National and Old National Bank are subject to various regulatory capital requirements administered by federal banking agencies. Failure to meet minimum capital requirements can elicit certain mandatory actions by regulators that, if undertaken, could have a direct material effect on Old National’s financial statements.

Table 3-2: Summary of regulatory capital positions and ratios

The following table summarizes capital ratios for Old National and Old National Bank:

(dollars in thousands)	Actual		Regulatory Minimum ⁽¹⁾		Prompt Corrective Action “Well Capitalized” Guidelines ⁽²⁾	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
March 31, 2026						
CET1 capital to risk-weighted assets						
Old National Bancorp	\$ 6,032,492	11.11 %	\$ 3,799,862	7.00 %	N/A	N/A
Old National Bank	\$ 6,076,903	11.25 %	\$ 3,782,084	7.00 %	\$ 3,511,935	6.50 %
Tier 1 capital to risk-weighted assets						
Old National Bancorp	\$ 6,276,211	11.56 %	\$ 4,614,118	8.50 %	\$ 3,257,025	6.00 %
Old National Bank	\$ 6,076,903	11.25 %	\$ 4,592,531	8.50 %	\$ 4,322,382	8.00 %
Total capital to risk-weighted assets						
Old National Bancorp	\$ 7,444,239	13.71 %	\$ 5,699,793	10.50 %	\$ 5,428,375	10.00 %
Old National Bank	\$ 6,596,432	12.21 %	\$ 5,673,126	10.50 %	\$ 5,402,978	10.00 %
Tier 1 capital to average assets (leverage ratio)						
Old National Bancorp	\$ 6,276,211	8.93 %	\$ 2,812,580	4.00 %	N/A	N/A
Old National Bank	\$ 6,076,903	8.67 %	\$ 2,802,466	4.00 %	\$ 3,503,083	5.00 %

- (1) “Regulatory Minimum” capital ratios include the 2.5% “capital conservation buffer” required under the Basel III Capital Rules.
- (2) “Well-capitalized” minimum common equity Tier 1 capital to risk-weighted assets and Tier 1 capital to average assets ratios are not formally defined under applicable banking regulations for bank holding companies.

At March 31, 2026, Old National and Old National Bank each exceeded the capital ratios required to be considered “well-capitalized” under applicable regulations. There have been no events since March 31, 2026 that management believes have changed the capital adequacy classification of Old National or Old National Bank.

Capital Conservation Buffer

Under the Basel III Capital Rules, the Company and Old National Bank are each required to have a minimum capital conservation buffer of 2.5% above the minimum required risk-weighted asset ratios. The capital conservation buffer is designed to absorb losses during periods of economic stress. Banking institutions with a ratio of CET1 to risk-weighted assets above the minimum, but below the conservation buffer, will face constraints on dividends, equity repurchases, and compensation based on the amount of the shortfall and the institution's "eligible retained income" (that is, the greater of (i) net income for the preceding four quarters, net of distributions and associated tax effects not reflected in net income and (ii) average net income over the preceding four quarters). The capital conservation buffer is calculated as the lowest of the (i) CET1 ratio less minimum CET1 requirement, (ii) Tier 1 ratio less minimum Tier 1 requirement and (iii) Total capital ratio less minimum Total capital requirement. Old National Bancorp and Old National Bank had \$742.1 million and \$833.5 million, respectively, of eligible retained income as of March 31, 2026.

Table 4: Capital conservation buffer

The following table presents the calculation of the capital conservation buffer.

(dollars in thousands)	Old National Bancorp	Old National Bank
March 31, 2026		
CET1 capital	11.11 %	11.25 %
Less: stated minimum requirement	4.50 %	4.50 %
	6.61 %	6.75 %
Tier 1 capital	11.56 %	11.25 %
Less: stated minimum requirement	6.00 %	6.00 %
	5.56 %	5.25 %
Total capital	13.71 %	12.21 %
Less: stated minimum requirement	8.00 %	8.00 %
	5.71 %	4.21 %
Capital conservation buffer (lowest of subtotals above)	5.56 %	4.21 %

Credit Risk

Old National has adopted a Risk Appetite Statement to enable our Board of Directors, Enterprise Risk Committee of our Board, Executive Leadership Team, and Senior Management to better assess, understand, monitor, and mitigate Old National's risks. Our Chief Risk Officer provides quarterly reports to the Board's Enterprise Risk Committee on various risk topics. Credit risk represents the risk of loss arising from an obligor's inability or failure to meet contractual payment or performance terms. Our primary credit risks result from our investment and lending activities. Community-based lending personnel, along with region-based independent underwriting and analytic support staff, extend credit under guidelines established and administered by management and overseen by our Enterprise Risk Committee. This committee, which meets quarterly, is made up of independent outside directors. The committee monitors credit quality through its general review of information such as delinquencies, credit exposures, peer comparisons, problem loans, and charge-offs. In addition, the committee provides oversight of loan policy changes as recommended by management with the objective of maintaining an appropriate lending policy for the current lending environment. For a more comprehensive discussion of our risks, see the "Risk Factors" section in Part I, Item 1A of Old National's 2025 Form 10-K.

Old National's business depends on the creditworthiness of our clients. We maintain allowances for credit losses for loans and debt securities to provide for defaults and nonperformance, which represent an estimate of expected losses over the remaining contractual lives of the loan and debt security portfolios. This estimate is the result of our continuing evaluation of specific credit risks and loss experience, current loan and debt security portfolio quality, present economic, political, and regulatory conditions, industry concentrations, reasonable and supportable forecasts for future conditions, and other factors that may indicate losses. The determination of the appropriate levels of the

allowances for loan and debt security credit losses inherently involves a high degree of subjectivity and judgment and requires us to make estimates of current credit risks and future trends, all of which may undergo material changes. Generally, our nonperforming loans, other real estate owned, and other repossessed property reflect operating difficulties of individual borrowers and weaknesses in the economies of the markets we serve. The allowances may not be adequate to cover actual losses, and future allowance for credit losses could materially and adversely affect our financial condition, results of operations, and cash flows.

For all loan classes, a loan is generally placed on nonaccrual status when principal or interest becomes 90 days past due unless it is well secured and in the process of collection, or earlier when concern exists as to the ultimate collectability of principal or interest. Interest accrued but not received is reversed against earnings. Cash interest received on these loans is applied to the principal balance until the principal is recovered or until the loan returns to accrual status. Loans may be returned to accrual status when all the principal and interest amounts contractually due are brought current, remain current for a prescribed period, and future payments are reasonably assured.

Any loans that are modified are reviewed by Old National to identify if a financial difficulty modification has occurred, which is when Old National modifies a loan related to a borrower experiencing financial difficulties. Terms may be modified to fit the ability of the borrower to repay in line with its current financial status. The modification of the terms of such loans includes one or a combination of the following: a reduction of the stated interest rate of the loan, an extension of the maturity date, a permanent reduction of the recorded investment of the loan, or an other-than-insignificant payment delay.

Credit quality within the loans held for investment portfolio is continuously monitored by management and is reflected within the allowance for credit losses on loans. The allowance for credit losses is an estimate of expected losses inherent within the Company's loans held for investment portfolio. Credit quality is assessed and monitored by evaluating various attributes and the results of those evaluations are utilized in underwriting new loans and in our process for estimating expected credit losses. Expected credit loss inherent in non-cancelable off-balance-sheet credit exposures (unfunded loan commitments) is accounted for as a separate liability included in other liabilities on the balance sheet. The allowance for credit losses on loans held for investment and unfunded loan commitments is adjusted by a credit loss expense, which is reported in earnings, and reduced by the charge-off of loan amounts, net of recoveries. Accrued interest receivable is excluded from the estimate of credit losses.

The allowance for credit loss estimation process involves procedures to consider the unique characteristics of our loan portfolio segments. These segments are further disaggregated into loan classes based on the level at which credit risk of the loan is monitored. When computing the level of expected credit losses, credit loss assumptions are estimated using a model that categorizes loan pools based on loss history, delinquency status, and other credit trends and risk characteristics, including current conditions and reasonable and supportable forecasts about the future. Determining the appropriateness of the allowance is complex and requires judgment by management about the effect of matters that are inherently uncertain. In future periods, evaluations of the overall loan portfolio, in light of the factors and forecasts then prevailing, may result in significant changes in the allowance and credit loss expense in those future periods. For further discussion regarding the evaluation of the allowance for credit losses on loans, see Note 1 "Basis of Presentation and Significant Accounting Policies" in Part II, Item 8 of Old National's 2025 Form 10-K.

Table 5-1: Geographic distribution of loan exposures

The following table presents the distribution of loan exposures by state.

(dollars in thousands)	Commercial	Commercial Real Estate	Residential Real Estate	Consumer	Total Loans	Percent of Total
March 31, 2026						
Minnesota	\$ 4,543,657	\$ 5,610,147	\$ 1,850,283	\$ 1,036,052	\$ 13,040,139	21 %
Illinois	4,852,047	3,815,139	1,461,354	1,154,078	11,282,618	18
Indiana	2,969,504	2,020,111	1,111,916	1,821,571	7,923,102	13
Wisconsin	1,684,095	3,070,995	561,832	435,029	5,751,951	9
Michigan	1,253,232	1,467,081	643,249	581,201	3,944,763	6
Tennessee	615,538	1,417,645	310,544	493,118	2,836,845	5
North Dakota	804,857	1,009,199	157,710	78,698	2,050,464	3
Kentucky	487,607	687,613	268,461	500,773	1,944,454	3
Florida	519,473	725,060	319,947	65,343	1,629,823	3
Texas	538,430	702,122	268,164	15,152	1,523,868	2
Ohio	777,812	566,322	10,523	17,231	1,371,888	2
Other	4,120,175	3,744,474	1,675,567	248,035	9,788,251	15
Total	\$ 23,166,427	\$ 24,835,908	\$ 8,639,550	\$ 6,446,281	\$ 63,088,166	100 %

Table 5-2: Loans and related commitments by industry⁽¹⁾

The following table presents the credit exposure of loans by industry.

(dollars in thousands)	Exposure	Percent of Total Loans
March 31, 2026		
Commercial:		
Manufacturing	\$ 3,671,421	6 %
Health care and social assistance	3,593,003	6
Construction	2,260,787	4
Real estate rental and leasing	2,119,934	3
Wholesale trade	1,997,549	3
Professional, scientific, and technical services	1,420,872	2
Accommodation and food services	1,320,662	2
Finance and insurance	1,231,885	2
Agriculture, forestry, fishing, and hunting	1,073,348	2
Retail trade	789,068	1
Administrative and support and waste management and remediation services	691,525	1
Transportation and warehousing	592,098	1
Educational services	456,795	1
Arts, Entertainment, and Recreation	421,160	1
Other services	408,913	1
Public administration	324,798	—
Other	792,609	1
Total commercial loans	23,166,427	37
Commercial real estate:		
Multifamily	8,324,945	13
Warehouse / Industrial	4,422,902	7
Retail	3,498,386	5
Office	3,011,306	5
Senior housing	1,258,342	2
Single family	513,144	1
Other	3,806,883	6
Total commercial real estate loans	24,835,908	39
Residential real estate	8,639,550	14
Consumer:		
Home equity	4,125,894	7
Other	2,320,387	3
Total consumer loans	6,446,281	10
Total	\$ 63,088,166	100 %

(1) Industry is defined as two-digit NAICS industry code for commercial loans, property type for the commercial real estate loans, and product type for residential real estate and consumer loans.

Table 5-3: Remaining contractual maturity by exposure type

The following table presents the remaining contractual maturity by exposure type.

(dollars in thousands)	1 Year or Less	After 1 - 5 Years	After 5 - 15 Years	After 15 Years	Netting ⁽¹⁾	Total
March 31, 2026						
Cash and cash equivalents	\$ 1,754,148	\$ —	\$ —	\$ —	\$ —	\$ 1,754,148
Debt securities	610,678	6,141,484	8,094,598	219,063	—	15,065,823
Loans	9,638,223	23,156,469	10,022,035	6,915,117	—	49,731,844
Derivatives	9,159	83,626	63,685	642	(112,288)	44,824
Total on-balance sheet	\$ 12,012,208	\$ 29,381,579	\$ 18,180,318	\$ 7,134,822	\$ (112,288)	\$ 66,596,639
Unfunded commitments ⁽²⁾	\$ 4,066,384	\$ 7,148,431	\$ 580,968	\$ 2,413,457	\$ —	\$ 14,209,240
Standby letters of credit	198,621	21,976	689	154	—	221,440
Total off-balance sheet	\$ 4,265,005	\$ 7,170,407	\$ 581,657	\$ 2,413,611	\$ —	\$ 14,430,680

(1) Amounts represent the impact of legally enforceable master netting agreements with counterparties that allow the Company to settle positive and negative positions and cash collateral held or placed with the same counterparties.

(2) Includes cancellable loan commitments totaling \$2.9 billion.

Table 5-4: Past due and nonaccrual by geography

The following table presents loans past due 30-89 days, loans past due 90 days or more, and non-accrual loans by state.

(dollars in thousands)	Accruing Loans		
	30-89 Days Past Due	Past Due 90 Days or More	Nonaccrual Loans
March 31, 2026			
Illinois	\$ 32,948	\$ 247	\$ 130,348
Minnesota	16,869	1,022	95,821
Indiana	15,581	184	66,849
Wisconsin	3,429	84	65,583
Tennessee	11,143	891	38,323
North Dakota	4,342	1,844	21,712
Michigan	5,310	61	11,089
Kentucky	5,305	73	8,719
Other	19,111	1	73,515
Total	\$ 114,038	\$ 4,407	\$ 511,959

Refer to Note 4 “Loans and Allowance for Credit Losses” in Part II, Item 8 of Old National’s 2025 Form 10-K for information on aging and accrual status by class of loan.

For the three months ended March 31, 2026, total gross charge-offs were \$37.3 million and total net charge-offs were \$32.0 million. Refer to Note 4 “Loans and Allowance for Credit Losses” in Part II, Item 8 of Old National’s 2025 Form 10-K for a reconciliation of the changes in the allowance for credit losses on loans by portfolio segment.

Table 5-5: Municipal securities by geography

The following table presents the amortized cost and relative percentage of our municipal securities by state.

(dollars in thousands)	Amount	Percent of Total
March 31, 2026		
Indiana	\$ 560,771	38 %
Texas	208,255	14
Minnesota	101,049	7
Michigan	62,966	4
Kentucky	59,433	4
Wisconsin	42,370	3
Washington	38,540	3
Missouri	37,525	3
Oregon	29,412	2
Massachusetts	29,177	2
Other ⁽¹⁾	302,541	20
Total	\$ 1,472,039	100 %

(1) No other state exceeds 2% of the portfolio.

Counterparty Credit Risk-Related Exposures

Counterparty exposure is the risk that the other party in a financial transaction will not fulfill its obligation. Counterparty credit risk related to OTC derivatives is limited to the termination value of contracts rather than the notional, principal, or contract amounts. All agreements with a counterparty are subject to an International Swaps and Derivative Association master agreement. If Old National has multiple contracts with a single counterparty, a master netting agreement can be utilized to obtain the right to offset, resulting in a net settlement of all contracts through a single payment in the event of default on or termination of any one contract.

Certain derivative instruments are subject to centrally cleared variation margin rules. These payments are considered in determining the fair value of all centrally cleared derivative instruments, effectively reducing the counterparty credit risk exposure.

Refer to Note 19 “Derivative Financial Instruments” in Part II, Item 8 of Old National’s 2025 Form 10-K for a table presenting the fair value of the Company’s derivatives and offsetting positions, including cash collateral pledged and net credit exposure.

Credit Risk Mitigation

Old National’s strategy for credit risk management includes well-defined credit policies, disciplined underwriting process, and ongoing risk monitoring and review processes. Old National’s loans consist primarily of loans made to consumers and commercial clients in many diverse industries, including real estate rental and leasing, manufacturing, healthcare, wholesale trade, construction, and agriculture, among others. Most of Old National’s lending activity occurs within our principal geographic markets in the Midwest and Southeast regions of the United States. Old National manages concentrations of credit exposure by industry, product, geography, client relationship, and loan size.

To mitigate its credit risk exposure on derivatives, Old National adheres to the same credit approval process used for traditional lending activities. Old National has established thresholds for credit approvals and limits, as well as monitoring procedures. In addition, Old National requires collateral for transactions above certain thresholds for each counterparty based upon their credit standing. Old National will enter into collateralization agreements with its derivative counterparties such that at no time will the unsecured credit exposure to a derivative counterparty exceed the limits of the Counterparty Credit Risk Policy. Credit exposure includes both the mark-to-market gain or loss and the net accrued interest receivable or payable on each transaction outstanding with the counterparty.

To mitigate additional credit risk exposure, Old National enters into risk participation agreements. With these agreements, Old National essentially shares a percentage of the credit risk related to interest rate swap transactions.

The fair value of the underlying swap is adjusted to include only Old National’s portion of the termination value, rather than the whole amount, which reduces Old National’s overall credit risk exposure in the event of default. For the notional amounts of purchased and sold risk participation agreements, see Schedule HC-L to Old National’s March 31, 2026 Consolidated Financial Statements for Holding Companies – Form FR Y-9C.

Securitizations

Our securitization-related activity has generally been limited to investing in securitized products created by third parties, as we do not currently originate or sponsor securitizations. In determining what exposures constitute securitization exposures, we use the definition as provided in Basel III. Our current securitization exposure is not significant. See Note 3 “Investment Securities” in Part II, Item 8 of Old National’s 2025 Form 10-K for more information regarding the securities that we hold.

Equities Not Subject to Market Risk Rule

Old National’s equity investments not subject to the market risk rule include restricted equity investments in FHLB and Federal Reserve Bank stock, mutual funds for Community Reinvestment Act qualified investments, diversified investment securities held in a grantor trust for participants in the Company’s nonqualified deferred compensation plan, and alternative investments that support affordable housing and other economic development and community revitalization initiatives.

FHLB and Federal Reserve Bank stock are carried at cost and periodically evaluated for impairment. Investments in marketable equity securities are recorded at fair value. Non-marketable equity securities are generally recorded either at historical cost or using the equity method.

Table 9-1: Equity exposures not subject to market risk rule

The following table summarizes the balance sheet carrying value of Old National’s equity securities not subject to the market risk rule.

(dollars in thousands)	Book Value	Fair Value
March 31, 2026		
Non-publicly traded	\$ 1,523,596	\$ 1,523,891
Publicly traded	126,778	124,051
Total	\$ 1,650,374	\$ 1,647,942

Table 9-2: Capital requirements of equity exposures by risk-weight

The following table summarizes the balance sheet carrying value of Old National’s equity securities not subject to the market risk rule.

(dollars in thousands)	Exposure Amount	Risk-Weighted Asset Amount
March 31, 2026		
Simple risk-weight approach:		
0%	\$ 186,219	\$ —
20%	319,258	63,852
100%	1,144,897	1,144,897
Total	\$ 1,650,374	\$ 1,208,749

Interest Rate Risk for Non-Trading Activities

Information on interest rate risk, interest rate sensitivity analysis, and our interest rate management process can be found in “Market Risk” in Part II, Item 7 of Old National’s 2025 Form 10-K.

APPENDIX 1: BASEL III REGULATORY CAPITAL DISCLOSURES MATRIX
