

New waters_connect System Monitoring Software Maximizes Productivity with Real-Time, Cloud-Native Lab Management

1/25/2023

News Summary:

- Cloud-native waters_connect System Monitoring is the only application that enables real-time remote monitoring of all chromatography instruments controlled by Waters' Empower Software.
- Enables lab managers and analysts to quickly identify available systems and dynamically respond to changing priorities.
- Helps maximize productivity by providing real-time visibility into instrument availability and status.

MILFORD, Mass.--(BUSINESS WIRE)-- Waters Corporation (NYSE:WAT) today announced waters_connect™ System Monitoring, a new Software-as-a-Service (SaaS) application that enables laboratory managers and analysts to monitor the real-time status of any chromatography instruments, regardless of the manufacturer, running on [Waters™ Empower™ Software](#).

The waters_connect System Monitoring app is the only cloud-native software application that enables real-time monitoring of all chromatography instruments controlled by Waters Empower software. (Photo: Business Wire)

The waters_connect System Monitoring application was developed especially for high-volume quality assurance/quality

control (QA/QC) laboratories. It can reduce the turnaround time of product release samples and facilitate the planning and progress of critical analyses via live, at-a-glance dashboard views of the operational status of chromatography instruments. The cloud-native application also helps lab managers utilize capital resources better by providing an understanding of instrument history and usage levels and improve the productivity of their teams.

“The pharmaceutical industry relies heavily on Empower Software to ensure that an uninterrupted supply of medicines reaches pharmacy shelves and the patients who need them,” said Dave Leitham, Vice President,

Connected Science, Waters Corporation. "The 'always-on' waters_connect System Monitoring dashboard lets lab managers and analysts look in on their instrument fleet from anywhere, anytime and helps them improve product release timelines and delivery schedules."

The waters_connect System Monitoring application is available immediately in Europe and North America.
