- Reported same-store occupancy of 92.2% as of March 31, 2017, compared to 91.4% as of March 31, 2016.

- Acquired two stores at completion of construction ("Certificate of Occupancy stores") with joint venture partners for a total purchase price of approximately \$16.2 million.
- Paid a quarterly dividend of \$0.78 per share.

Joseph D. Margolis, CEO of Extra Space Storage Inc., commented: "We started the year with an excellent first quarter. We experienced the benefits of a highly diversified portfolio with certain markets accelerating, while

others moderated. Our same-store revenue growth was solid at 5.8% and expenses were better than expected, resulting in same-store NOI growth of 9.2%. Quarter-end occupancy was over 92%, and we are well positioned as we head into our busy season. Our strong same-store NOI growth helped increase FFO as adjusted by 20%."

FFO Per Share:

The following table outlines the Company's FFO and FFO as adjusted for the three months ended March 31, 2017 and 2016. - (1) Per share amounts may not recalculate due to rounding.
- (2) Adjustment to account for the difference between the number of shares used to calculate earnings per share and the number of shares used to calculate FFO per share. Earnings per share is calculated using the two-class method, which uses a lower number of shares than the calculation for FFO per share and FFO as adjusted per share, which are calculated assuming full redemption of all OP units as described in note (4).
- (3) Beginning January 1, 2017, acquisition related costs have been capitalized due to a change in accounting literature, thus eliminating the need for an adjustment to FFO as adjusted attributable to common stockholders and unit holders.
- (4) Extra Space Storage LP (the "Operating Partnership") has outstanding preferred and common operating partnership units ("OP units"). These OP units can be redeemed for cash or, at the Company's election, shares of the Company's common stock. Redemption of all OP units for common stock has been assumed for purposes of calculating the weighted average number of shares — diluted as presented above. The computation of weighted average number of shares — diluted for FFO per share and FFO as adjusted per share also includes the effect of share-based compensation plans and shares related to the exchangeable senior notes using the treasury stock method.

Same-store occupancy at March 31, 2017 increased a total of 80 basis points compared to March 31, 2016. This includes the impact from the addition of 168 stores to the same store pool on January 1, 2017.

Same-store revenues for the three months ended March 31, 2017 increased due to gains in occupancy and higher rental rates for both new and existing customers. Expenses were lower for the three months ended March 31, 2017 due to decreases year-over-year across most expense categories. The most significant decreases to expenses were in office, insurance and payroll. Decreases in expenses were partially offset by increases in marketing expense.

Major markets with revenue growth above the Company's portfolio average for the three months ended March 31, 2017 included Las Vegas, Los Angeles, Orlando, Sacramento, and West Palm Beach/Boca Raton. Major markets performing below the Company's portfolio average included Boston, Denver, Houston, New York City/Northern New Jersey and Washington, D.C./Baltimore.

Definition of FFO:

FFO provides relevant and meaningful information about the Company's operating performance that is necessary, along with net income and cash flows, for an understanding of the Company's operating results. The Company believes FFO is a meaningful disclosure as a supplement to net income. Net income assumes that the values of real estate assets diminish predictably over time as reflected through depreciation and amortization expenses. The values of real estate assets fluctuate due to market conditions and the Company believes FFO more accurately reflects the value of the Company's real estate assets. FFO is defined by the National Association of Real Estate Investment Trusts, Inc. ("NAREIT") as net income computed in accordance with U.S. generally accepted accounting principles ("GAAP"), excluding gains or losses on sales of operating stores and impairment write downs of depreciable real estate assets, plus depreciation and amortization and after adjustments to record unconsolidated partnerships and joint ventures on the same basis. The Company believes that to further understand the Company's performance, FFO should be considered along with the reported net income and cash flows in accordance with GAAP, as presented in the Company's consolidated financial statements. FFO should not be considered a replacement of net income computed in accordance with GAAP.

For informational purposes, the Company also presents FFO as adjusted which excludes revenues and expenses not core to our operations, acquisition related costs (prior to 2017) and non-cash interest. Although the Company's calculation of FFO as adjusted differs from NAREIT's definition of FFO and may not be comparable to that of other REITs and real estate companies, the Company believes it provides a meaningful supplemental measure of operating performance. The Company believes that by excluding revenues and expenses not core to our operations, the costs related to acquiring stores and non-cash interest charges, stockholders and potential investors are presented with an indicator of its operating performance that more closely achieves the objectives of the real estate industry in presenting FFO. FFO as adjusted by the Company should not be considered a replacement of the NAREIT definition of FFO. The computation of FFO may not be comparable to FFO reported by other REITs or real estate companies that do not define the term in accordance with the current NAREIT definition or that interpret the current NAREIT definition differently. FFO does not represent cash generated from operating activities determined in accordance with GAAP, and should not be considered as an alternative to net income as an indication of the Company's performance, as an alternative to net cash flow from operating activities as a measure of liquidity, or as an indicator of the Company's ability to make cash distributions.

Definition of Same-Store:

The Company's same-store pool for the periods presented consists of 732 stores that are wholly-owned and operated and that were stabilized by the first day of the earliest calendar year presented. The Company considers a store to be stabilized once it has been open for three years or has sustained average square foot occupancy of 80.0% or more for one calendar year. The Company believes that by providing same-store results from a stabilized

pool of stores, with accompanying operating metrics including, but not limited to occupancy, rental revenue (growth), operating expenses (growth), net operating income (growth), etc., stockholders and potential investors are able to evaluate operating performance without the effects of non-stabilized occupancy levels, rent levels, expense levels, acquisitions or completed developments. Same-store results should not be used as a basis for future same-store performance or for the performance of the Company's stores as a whole.
