

NEWS RELEASE

Hinge Health unveils new AI-powered care tools

2025-10-21

SAN FRANCISCO--(BUSINESS WIRE)-- Hinge Health, Inc. (NYSE:HNGE) today announced two AI-powered care tools: Movement Analysis uses computer vision to set a new standard for tracking musculoskeletal (MSK) outcomes, and Robin is an AI Care Assistant that provides instant support for members. Hinge Health also published its AI care principles, which guide the development of AI across its platform.

“Our thoughtful investments in AI are transforming how our members experience care,” said Daniel Perez, Co-Founder and CEO of Hinge Health. “Our new Movement Analysis and our AI Care Assistant, Robin, are the latest examples of how we’re using technology to make care more accessible, personalized, and effective.”

Reimagining outcome tracking with AI

There are many measurement tools to track outcomes in MSK care; while valuable - almost all rely on subjective questions and are therefore self-report only. Hinge Health’s new Movement Analysis uses TrueMotion® computer vision technology to guide members through targeted movements - capturing joint angles, symmetry, and endurance. Pairing those objective measurements with targeted questions creates first-of-its-kind Hinge Scores for joint health. This enables members to monitor their own progress and their relative performance compared to others. Meanwhile, clinicians gain a uniquely composite view to make faster, more impactful, and personalized treatment decisions.

Complementing the care team with AI

The best orthopedic clinics employ diverse care teams across various specialities. Likewise, one of Hinge Health’s greatest strengths is its comprehensive care team of doctors, physical therapists, nurses, and health coaches. Now, we’re complementing our care team with Robin, a groundbreaking AI Care Assistant that provides 24/7 support. Robin is a smart and increasingly capable companion that can help members navigate their care.

Robin's first task is recognizing pain flare-ups, a typical occurrence in a member's care journey. Robin instantly gathers more details, shares resources, and summarizes the situation for the member's physical therapist - accelerating care. Soon Robin will answer common questions, share insights, and proactively check in with members.

Commitments for responsible AI development

Responsible AI development is foundational to Hinge Health's approach. The below core commitments guide the company's AI development decisions:

- AI that is thoughtfully designed
- AI that is built responsibly
- AI that complements human care

Underpinning these commitments are principles that prioritize ethical use, privacy and security, transparency, and continuous improvement. For more, see **this page** on Hinge Health's website.

About Hinge Health

Hinge Health is focused on scaling and automating the delivery of health care, starting with musculoskeletal conditions. Leveraging an AI-powered care model, wearable devices, and access to expert clinicians, Hinge Health delivers personalized, evidence-based care that helps people move beyond pain, improving member outcomes and experiences, and reducing costs for clients. The company is headquartered in San Francisco, California.

Forward-Looking Statements

This press release may contain forward-looking statements that involve risks and uncertainties, including, without limitation, certain statements regarding our product capabilities, features, availability, performance, expected benefits and impact of Movement Analysis and Robin; the anticipated timing of new or expanded functionalities; our responsible AI commitments and principles; our business strategy, plans, goals, growth opportunities, clinical and economic outcomes, member experience, and ability to scale AI across our platform. Forward-looking statements are neither forecasts, promises nor guarantees, and are based on the current beliefs of management and information currently available to them. Forward-looking statements are subject to numerous known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from those projected. More details about these and other risks that may impact our business are described in our filings with the U.S. Securities and Exchange Commission. We undertake no obligation to update these forward-looking statements, which speak only as of the date hereof.
